**TECHNICAL BULLETIN**  
**ISSUED : 28 Mar 006**  
**DOCUMENT : TB 004**  
**FIRE SENSORS**

## ***TECHNICAL BULLETIN***

### **FIRE DETECTOR NAME CHANGE**

The fire detection system designed for ETI used the following product identification at the time of the systems release and during the roll out training.

PART DETECT1.0    DESCRIPTION: FIRE DETECTOR LENGTH 1.0 METRE  
PART DETECT1.5    DESCRIPTION: FIRE DETECTOR LENGTH 1.5 METRE  
PART DETECT2.0    DESCRIPTION: FIRE DETECTOR LENGTH 2.0 METRE

The part number and description has been changed from detector to sensor. This is because this component has a dangerous goods rating and the term sensor is preferred in describing it for its classification in transporting. Please also refer to MSDS 002A. This is now re-issued as amendment A, recording the correct part numbers and descriptions on that document.

The part numbers and descriptions are now;

PART SENS1.0    DESCRIPTION: FIRE DETECTOR LENGTH 1.0 METRE  
PART SENS1.5    DESCRIPTION: FIRE DETECTOR LENGTH 1.5 METRE  
PART SENS2.0    DESCRIPTION: FIRE DETECTOR LENGTH 2.0 METRE

There are no engineering changes. Please simply substitute the new descriptions in any existing documents until such time as they are re-issued with the updated descriptions.

APPROVED: BAMBANG ISTI YUDONO
